SECTION C Descriptions and Specifications**STATEMENT OF WORK****Gun Weapon System MK34 Mod4 Prototype Display Subsystem****1 INTRODUCTION**

This Statement of Work (SOW) defines the efforts to be performed by the contractor to develop, integrate, test, and deliver hardware and software for a prototype display subsystem to be integrated by NSWC/Dahlgren Code T25 into the Gun Weapon System (GWS) Mk 34 Mod 4 operator console.

2 BACKGROUND

The MK34 Mod4 Gun Weapon System (GWS) is being developed to replace the MK86 Gun Fire Control System as a part of the CG-47 Class Cruiser Conversion Upgrade Program. NSWC/Dahlgren code T25 is developing a Gun Weapon System (GWS) console. Work to date has produced an early prototype developed around PrimaGraphics radar and video processing cards. These cards are unique in that they accept the following; specialized radar video input formats, 12 camera video inputs which support the required video formats, support for maps, support for numerous X-Windows graphics overlays, and support for real-time digital display recording. Prototype software developed to date utilizes low level PrimaGraphics library calls.

The next step toward meeting the MK34 GWS display requirements is procurement of a display subsystem to support integration with other prototype console hardware and software. This display subsystem shall consist of a set of cards, associated hardware, and an associated software toolset. T25 engineers are familiar with the PrimaGraphics toolset and software application program interfaces (API). This display subsystem cardset must be compatible with the existing prototype hardware and software interfaces, while providing capability to handle real-world input requirements.

3 EFFORT TO BE PERFORMED

The contractor shall develop, integrate, test, and deliver display subsystem hardware and software which meets the requirements in the attached specification.

3.1 The contractor shall develop and deliver hardware items in accordance with the attached Deliverable List, and in accordance with the attached specification. The contractor shall integrate the specified hardware and software items to form three display subsystem prototypes.

3.2 The contractor shall develop and deliver data items in accordance with the attached Deliverable List, and in accordance with the attached specification.

3.3 The contractor shall develop and deliver a Software Framework Architecture (SFA) in accordance with the attached specification; to include executable software and source code and library files

3.4 The contractor shall develop a variant of the Osprey which accepts the UYQ-21 radar data format in accordance with the attached specification.

3.5 Reviews

3.5.1 The contractor shall prepare and present a kick-off meeting within 15 days after receipt of order; which shall include a schedule, a plan, and provide a design disclosure of the hardware and software to be delivered.

3.5.2 The contractor shall prepare and execute a final contractor test and demonstration of the display subsystem hardware which will be witnessed by government representatives.

3.5.3 The contractor shall prepare and present a Final Status Review at the beginning of final contractor testing; which shall include a design disclosure of the hardware and software as built, and a description of the planned testing.

CLAUSES INCORPORATED BY FULL TEXT**Ddl-H45 ENGINEERING CHANGES**

(a) After contract award, the Government may solicit, and the Contractor is encouraged to propose independently, engineering changes to the equipment, software specifications, or other requirements of this contract. These changes may be proposed to save money, to improve performance, to incorporate new technology, to save energy, or to satisfy increased data processing requirements. If the proposed changes are acceptable to both parties, the Contractor shall submit a priced change proposal to the Government for evaluation. Those proposed engineering changes that are acceptable to the Government will be processed as modifications to the contract.

(b) This ENGINEERING CHANGES clause applies only to those proposed changes identified by the Contractor, as a proposal submitted pursuant to the provisions of this clause. As a minimum, the following information shall be submitted by the Contractor with each proposal:

(1) A description of the difference between the existing contract requirement and the proposed change, and the comparative advantages and disadvantages of each;

(2) Itemized requirements of the contract which must be changed if the proposal is adopted, and the proposed revision to the contract for each such change;

(3) An estimate of the changes in performance and cost, if any, that will result from adoption of the proposal;

(4) An evaluation of the effects the proposed change would have on collateral costs to the Government, such as Government-furnished property costs, costs of related items, and costs of maintenance and operation; and

(5) A statement of the time by which the change order adopting the proposal must be issued so as to obtain the maximum benefits of the change(s) during the remainder of this contract. Also, any effect on the contract completion time or delivery schedule shall be identified.

(c) Engineering change proposals submitted to the Contracting Officer shall be processed expeditiously. The Government shall not be liable for proposal preparation costs or any delay in acting upon any proposal submitted pursuant to this clause. The Contractor has the right to withdraw, in whole or in part, any engineering change proposal not accepted by the Government

within the period specified in the engineering change proposal. The decision of the Contracting Officer as to the acceptance of any such proposal under this contract shall be final.

(d) The Contracting Officer may accept any engineering change proposal submitted pursuant to this clause by giving the Contractor written notice thereof. This written notice may be given by issuance of a modification to this contract. Unless and until a modification is executed to incorporate an engineering change proposal under this contract, the Contractor shall remain obligated to perform in accordance with the terms of the existing contract.

(e) If an engineering change proposal submitted pursuant to this clause is accepted and applied to this contract, an equitable adjustment in the contract price and in any other affected provisions of this contract shall be made in accordance with this clause and other applicable clauses of this contract. When the cost of performance of this contract is increased or decreased as a result of the change, the equitable adjustment increasing or decreasing the contract price shall be in accordance with the "CHANGES" clause rather than under this clause, but the resulting contract modification shall state that it is made pursuant to this clause.

(f) The Contractor is requested to identify specifically any information contained in the engineering change proposal which the Contractor considers confidential and/or proprietary and which the Contractor prefers not be disclosed to the public. The identification of information as confidential and/or proprietary is for informational purposes only and shall not be binding on the Government to prevent disclosure of such information. Offerors are advised that such information may be subject to release upon request pursuant to the Freedom of Information Act (5 U.S.C. 552)
